

# Cabin Respite Service

**The cabin is a homely bungalow house with seven single bedrooms. Social areas include two lounges looking out onto our gardens and patio area where we have barbeques in the summer.**

**Hansel had always offered limited respite places within the residential homes and had built good relationships with service users, carers, and purchasers throughout Scotland.**

**This was the starting point for designing an environment that could offer high quality respite services.**

**For 51 weeks a year we provide a service for 7 service users each week, the diversity of needs and expectations are wide ranging and we work with each person as an individual striving to meet their expectations on each visit.**

**One of our main attractions to the respite service is the ability to give all service users different choices of fun filled activities. Each day we provide varied outings across the country; these can be from Edinburgh to Portpatrick and from Ten Pin Bowling to Cinema outings.**
